

Assignment -2

Python Programming

Assignment Date	24September 2022
Student Name	Aishwarya.K
Student Roll Number	820419106004
Maximum Marks	2 Mark

Question-1:

Build a python code, Assume u get Temperature and Humidity values (Generated with Random Function to a Variable) and write a condition to continuously detect alarm in case of high temperature.

Solution:

```
import random as rd
```

```
import time as t
```

```
while 1:
```

```
    temperature=rd.randint(0,100)
```

```
    moisture=rd.randint(0,100)
```

```
    if temperature>=60:
```

```
        print("warning!!Detected Temperature:"+str(temperature)+"*c")
```

```
    if moisture>=60:
```

```
        print("warning!!Detected Moisture:"+str(moisture)+"%")
```

```
    if temperature>=60 & moisture>=60:
```

```
        print("warning!!Detected both Temperature and Moisture:"+str(temperature)+"*c  
and"+str(moisture)+"%")
```

```
    elif temperature>=60 & moisture>=60:
```

```
        print("Both temperature and moisture are in normal condition")
```

```
    elif moisture<=60:
```

```
        print("normal moisture condition")
```

```
    elif temperature<=60:
```

```
        print("good temperature")
```

```
    t.sleep(1)
```

```
